

## PREPARING DATA FOR CNC ROLAND MDX 40-A

### Data Making

1

**Prepare** your design using Adobe Illustrator.

**NOTE:**

For PCB material projects use Fab Module to create design.

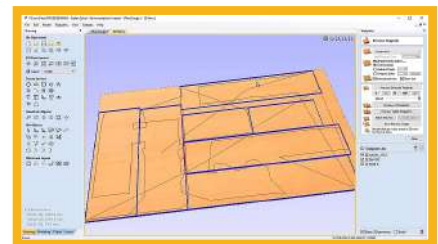

2

**Set** your design in VCARVE.

**NOTE:**

For PCB material materials save file to png. Then use NC Coding > Roland Dr. Engrave Setting

3

**Save** file, **convert** the program to a text file, then **save** it on the computer. This file is called the “output file”.
