

HOW TO MAINTAIN THE BROTHER PR1000e EMBROIDERY MACHINE

Machine Maintenance

Basic Tools and Equipment needed in cleaning the Embroidery Machine.

- Syringe (contains the oil of the machine)
- Screwdriver
- Thread puller
- Brush

Oiling the machine

Turn off the embroidery machine

Open the hook cover then remove the bobbin case

Rotate the handwheel (about 50 degrees) to move the race of the hook to a position where it can easily be oiled

Be sure to rotate the handwheel counterclockwise

Add 1 drop of oil into the hook race

After oiling, insert the bobbin case into the hook, and then close the hook cover

Importance of Oiling the machine

In order to extend the life of the machine's parts and keep the machine operating correctly, be sure to oil the machine before the first time that is used.
